

Aitana

Technology and innovation

The best AUTOTROL technology with a 255 - 760 valve.

Total control

Digital programmer with multiple programming possibilities which perfectly adapt to the water consumption of your home.

Efficiency and saving

Downflow compact softener of advanced technology for high efficiency in regeneration.

Easy installation and maintenance

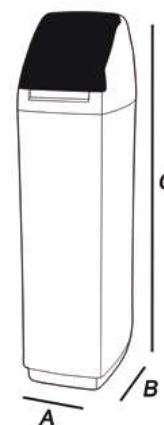

European Certificate of Conformity

COMPACT SOFTENER FOR WATER OF DOMESTIC USE

Aitana is the best softener that transforms hard water from the network into soft water, avoiding lime deposits in pipes and faults in your appliances.

A soft water will improve your home cleaning, saving up to 50% in cleaning products. The faucets and bathrooms will look like new. You will also notice its benefits also on your skin and on your clothes, leaving everything much softer.

AITANA MODEL 255-760 AUTOTROL SOFTENER

Compact automatic softener for water hardness removal by ion exchange resins.

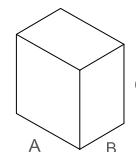

255-760 meter valve, digital programmer and delayed downflow regeneration.

High efficiency in regeneration: consumption of salt 150 grams of salt per resin litre.

- Cabinet made of blown polyethylene
- GRP vessel reinforced in polyester
- Regeneration by average consumption
- Programmable frequency regeneration
- Hardness mixer included
- Turbine for the volume control of the treated water
- 1" Connection
- Bypass included
- Loaded with food grade resin of high capacity with high performance.
- Working pressure: 2,5 to 6 Bar
- Max. temperature: 40°C
- Power supply: 230V-50Hz 24V
